

Essence of style

Wearing perfume is a way of expressing yourself, your own individual style and personality: it is a kind of **olfactory signature** that reflects not only the surroundings it imbues but also the pervading atmosphere.

In our new line, the Perfume gives us an opportunity to sensorially represent the way in which lifestyle and fashion have changed throughout history.

Twelve fragrances, each of which represents a style, taking its inspiration from fashion, literature, music, cinema, and all the aspects that have profoundly influenced them.

A perfume that tells a story, that tells your story.
